Throughout his career, Michael Reisman emphasized law's function in shaping the future. In this wide-ranging collection of essays, major thinkers in the international legal field address the goals of the twenty-first century and how international law can address the needs of the world community. The result is a volume of outstanding scholarship that will appeal to all those lawyers, political scientists, and educated laymen interested in international law, legal theory, human rights, international investment law and commercial arbitration, boundary issues, law of the sea, and law of armed conflict.
