

Literature and the Child (Non-InfoTrac Version)

Since this book's debut, *LITERATURE AND THE CHILD* has become a popular choice in the children's literature market. The book covers the two major topical areas of children's literature--genres of children's literature (e.g., picture books, folklore, etc.) and the use of children's literature in the classroom. The book is beautifully written and illustrated to reflect the tone and feel of children's books themselves. Extensive booklists are provided for the student to use as an ongoing resource. A new CD-ROM linked to a powerful Web site includes many valuable instructor resources and an appendix that lists the best children's Web sites.
