

Strange Things Happen to Normal People

While participating in an internet chat room one day, Paul is told by an online stranger that he will be visited by seven entities. Most of them are aliens, but some are from other dimensions, and one is even a time traveler. With the help of these seven entities, Paul finally receives some explanations that just might solve six strange personal mysteries that haunted his life. What makes this book unique is that one visitor is a future reincarnation of Pauls from the year 3013, a redheaded female that just delights in playing pranks on Paul.
