

Psychic Photographer

Psychics around the world thought it was an urban legend, a rare 35mm camera that can enable the viewer to see apparitions. Carly Zane, a professional photographer, discovers the story to be true when her departed sister, Nya, leaves Carly an unusual, old camera that takes her own psychic abilities to another dimension. When Katie Emmet, who Carly discovers had died six months ago, keeps showing up in her pictures, and then appearing in her visions, Carly investigates, with her best friend, Detective Genna Steinbreck, to see if they can find out why Katie's spirit hasn't crossed over yet. When they encounter clues that Katie was murdered, instead of dying in an accidental drowning as originally reported, the killer comes out of hiding to stop the truth from being told.
