

The Stability Imperative: Human Rights and Law in China (Asia Pacific Legal Culture & Globalization)

Growing inequality within Chinese society has led to public indignation, petitions to Party and state agencies, strikes, and large-scale protests. This book examines the intersection between the Chinese governments preoccupation with the protection of social stability (weiwen), and its legal commitments to protect human rights. Drawing on case studies, Sarah Biddulph examines Chinas response to labor unrest, medical disputes, and public anger over forced housing demolition. The result is a detailed analysis of the multiple and shifting ways stability imperatives impinge on the legal definition and implementation of human rights in China.
